This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFATORY NOTE

The purpose of this List is to supply material for a study of the Supreme Court of the United States.

The List is in four sections: The first containing general works on the court; the two next, the reports and digests; and the last, biographical material on the chief justices and associate justices. With this last section are noted some of the more important writings of the chief justices. It was found inexpedient at this time to include the pamphlet literature produced by the earlier justices. Should a second edition be called for it is hoped to include this material.

The List does not attempt the completeness of a bibliography. A great number of unimportant United States documents, for instance, have been purposely omitted. They consisted mostly of reports, resolutions, etc., which affected the Supreme Court very slightly, if at all. To have included them would have cumbered the list with material of little moment, sufficiently indicated in the existing indexes to United States documents.

The series of lists of which this is an example are undertaken in the Division of Bibliography and issued over the signature of the Chief Bibliographer. The responsibility for the inclusion or exclusion of titles rests, of course, with him. In all of the lists, however, the division draws freely upon other divisions of the Library for information, and particularly upon its former chief, the present Chief Assistant Librarian, for criticism and suggestion.

This aid is cordially given, of great value, and heartily appreciated; and if it is not specifically acknowledged in the preface to each list, the omission is merely to save repetition of a fact familiar within the Library and a matter of administrative, rather than of public interest.

"Thus it will be seen that the first century of the existence of this court expires between the close of the present term and the opening of October Term, 1889. In view of this fact, after consultation with friends in whose judgment I place confidence, I have gathered together several matters connected with the judicial history and decisions of the highest courts of the United States prior to the adoption of the Constitution; and I have placed them in this Appendix, in order that they may be preserved in connection with the decisions of the highest court since its adoption, and in the belief that they will prove interesting and useful to the practising constitutional lawyer, as well as to the student of our judicial system." p. xii.

"But the makers of the Constitution no more intended an omnipotent judiciary than an omnipotent legislature. They did not contemplate that their gift of legislative power should be obstructed or annulled by an intermeddling court. They intended, let us suppose, to give to Congress the ability

in a great crisis, to raise money by a tax on incomes and to raise it in a way that would not shock the sense of justice of the people and provoke a revolution."

The "Great usurpation" here means the action of the Supreme Court in declaring laws unconstitutional.
